KEYWORDS: Modern pathways 2020, reformative education, UPI, and many fears like poverty etc.

1. INTRODUCTION

India, with its abundant historical tradition, various civilization and pivotal role on international level, surpasses both vast presence and facing in its progress word. Our country is currently 5th largest economy globally by nominal GDP and is playing a major role to reach 4th, and till 3rd largest economy after USA and CHINA. Why this progress is coming because Indians are progressing and consume large consumer goods.

therefore, India is hub for many companies from China and Usa and also from European countries.

Current Progressing Work of our Country

Infrastructural development-now a days, from recently 25 years ago, our country is progressing in the area of infrastructure. All remote and poor states like Bihar, Orissa etc. are connected through all weather usable road services. Time is saving

distance is covered in less time. Due to this, goods and services are easily available. Cost cutting possible. Due to this Indian economy is boosting very high.

Skill development-present central government focusing on skill development.it is reality so that India's unemployment is nothing only it is present due to unskilled worker. When skilled worker will be available then Indian economy will use their population to make progress. Environmental aspects-India's rapid urbanization, industrialization and energy consumption have been resulted into severe environmental challenges, including air pollution, water scarcity and deforestation. The referred challenges point out the imbalanced cycle of environment.it is to be noted that, the sustainable development practices have to be integrated with the nation's economic strategies to ensure that growth does not come at the expense of future generations.by and large, it is the moral responsibility to hand over well secure environment with the working strategies of sustainable developments to the next generations.

The progress of economic growth- Our country is working to reduce poverty for this grain project on subsidized rate are available for more than 100 crores population. Central and state govt. health insurance schemes are available to all peoples more than age of sixty years till 5 lakhs and also for poor people under this scheme. Education is free in government institution for poor people .due to these activities, progress curve of economic growth is very sharp.

Main development pathways for India

Economic diversification -our country is diversified today in many areas like make in India Abhiyan. We are the exporter of made in Indian mobile phones. How is it possible. Due to central government production incentive scheme and our economy is focusing defense sector export also in Nigeria, Armenia, Jamaika, Indonesia, France etc.

Leveraging technological advancements

Technology and innovations have the potential to transform India's development pathways. The Indian government's digital India initiative has helped foster growth in digital infrastructure and connectivity. Opening avenues for further advancements in education, healthcare, agriculture and governance.it has provided multiple facilities with no time urgency and less costs. The country becomes a suburban sector into the global village.

Artificial intelligence and automation

Artificial intelligence is making important role in economy's growth. AI is consuming job but creating other sector job creation which is helped for progressive country like India.

Digital data security

Today's data security is possible wen in large number software experts are available. Sustainable and green growth-India's growth is sustainable and making environmental strong making activities are going on. Due to this our economy is progressing.

Inclusive growth and social development

NEP 2020, make in India Abhiyan, production incentive scheme, Degree is not important for job. Skill is more useful for job creation and job seeker. These are the making paramount changing in the area of growth.

Empowering women

New research has published so that when female workers are increasing in any industry. Productivity of the concerned industry is strong and profitability is coming.

Education and skill development reform-reforming India's education system is critical for creating a knowledge-driven economy.it includes modernizing curricula, enhancing vocational training and fostering innovation and research.

Skill development for the workforce

Many programs are continuing to making skilled workers. Challenges in implementation while the potential for growth is immense, these are significant challenges in implementing these development pathways.

Political and Bureaucratic challenges

Bureaucratic challenges are bad for growth's are not wanting to work smoothly.

Social inequality and Regional Disparities

Our societies are unequal due tothis, many worst situations are coming.

Infrastructure and Resource constraints

The rapid pace of urbanization put additional strain on India's infrastructure, which is already overstretched. The issue is exacerbated by resource constraints, making it essential to prioritize investments in critical infrastructure like roads, sanitation and energy.

Global economic and Geopolitical Dynamics

India's development is also shaped by global economic trends and geopolitical dynamics. The global economic slowdown, trade imbalances and international conflicts can influence India's developments trajectory. Ensuring economic resilience through strategic global partnerships is crucial.

CONCLUSION

At last, I think so that our country's growth will remain unchanged when skilled worker and export oriented will be continued and domestic consumable of goods.challenges come while growth is continued. Government production incentive scheme is very useful to boost our economy's growth.
